### INTERNAL COMMUNICATION

#### ESTABLISHMENT OF DENTAL EDUCATION UNIT

1. The Dental Education Department is being established by the college on 6<sup>th</sup> Sep, 2021 for the range and quality of Faculty Development Program in emerging trends in Dental Education Technology.

#### **The main objectives of the Dental Education Unit are to:**

- To ensure continuous quality improvement in teaching learning and assessment in professional education
- To facilitate educational research through projects and research publication
- To update the faculty of the current trends in dental education by conducting workshops and conferences.
- To contribute towards institutional activities of feedback system, communication skills, humanities and Professionalism

**Vision:** Strive to impart excellence in Dental Education and Practice

#### **Mission**

- To enhance the quality of teaching, learning and assessment of students at various levels of educational initiatives.
- To transform teachers into competent dental educators

#### **Committee Members**

- Presiding Officer :Dr. Krishna Priya V (Prof. & Head, Dept. of Pedodontics)
- Members:
  1. Dr. Ajay Reddy P (Reader, Dept. of Periodontics)
  2. Dr. G Madhusudhana Rao (Reader, Dept. of OMFS)
  3. Dr.Soujanya E (Reader, Dept. of Conservative Dentistry and Endodontics)
  4. Dr. Sai Geeta K (Senior Lecturer, Dept. of Pedodontics)
  5. Dr. Pratima Soni (Senior Lecturer, Dept. of Oral Medicine and Radiology)

## Summary And Report

An induction program was conducted for the MDS Batch 2021 from 11<sup>th</sup> November to 22<sup>nd</sup> November, 2021. This one-week program was initiated by Dr. Subramanya Sharma, Principal and coordinated by the Dental Education Committee. i.e. Dr. Krishna Priya, Dr. Ajay Reddy, Dr. Madhusudhana Rao, Dr. Soujanya, Dr. Pratima Soni and Dr. Saigeeta. The first day of induction program was graced by Dr. Subramanya Sharma, Principal, Col. P.G. Krishna, Registrar, Head of various departments and all the teaching faculty members. All first year MDS students and few parents attended the program. The program began with the lecture "Introduction to ACDS", by Dr. David Tyro, Senior Lecturer, Department of Oral and Maxillofacial Surgery, followed by the Welcome address by Principal Sir. Dr. Sukhvinder Bindra enlightened students with "Outcome based education program". On the following days of the program, the MDS students were given an insight into topics like details of MDS Syllabus, mentorship program, Sexual Harassment, documentation of dental records, importance of clinical case recording, dental photography, effective seminar presentation, Research methodology, basics of biostatistics and bio ethics, Principles of Andragogy, interdisciplinary management of clinical cases, soft skills, PBL, CBL and computer skills by faculty members of various departments. They were also introduced to college committees, anti-ragging and code of conduct. Students visited all the Departments and interacted with Head of the Departments and faculty members. Faculty members explained about the facilities available in their departments. The overall program was well received by all the MDS 1<sup>st</sup> year students with positive feedback.

Contemporary Teaching and Learning Methods  
Program Report

The modern teaching methods or more accurately stated as the student centric methods which helps students for improving their intellect behavior by using various new and innovative ideas rather than making them recite the syllabus to clear the examination with the same old route learning method.

In the Army College of Dental Sciences a lecture was organized by the Dental Education Unit ON the 1<sup>st</sup> of December on the topic “Contemporaneous methods of teaching, learning and Assessment in dental undergraduate education.”

The new teaching method that centers the learners mind and involves them entirely into the process of learning, ergo keeping the learner as the primary target. In order to incorporate this in the daily teaching methodologies 25 faculty members attended the lecture.

The lecture was a success in view of the ideas being juggled and an active participation by all the attendees.

## Program Report- Diagnosis and Treatment Planning

Diagnosis and Treatment planning is a problem-solving process of analyzing information gathered from the patient and different investigations carried out. Team of Army College of Dental Sciences organized a Program on Diagnosis and Treatment planning on the 22<sup>nd</sup> January 2022. The lecture was taken by Dr. Madhusudana Rao, Reader, Department of Oral and Maxillofacial Surgery.

In order to become better equipped clinician and foster excellent physician; 32 participants were present which included students as well as staff. All the participants were divided into groups of four and asked to prepare a treatment plan for different case scenarios. There was active participation by everybody and an in depth understanding behind the various approaches that can be followed in order to provide the patient with a holistic treatment.

Among the students 90% thought that the lecture will prove to be extremely helpful in the course of study.

The key take away from the session was the multidisciplinary approach towards a case thereby providing a holistic and an evidence based treatment plan.

Feedback forms were distributed among the participating students few suggestions given by the students included that the presentation must incorporate more graphics and that such discussions must be done on a regular basis.

## Program Report – Problem Based Learning

Problem based learning is a problem-solving process of gathering and analyzing examination information from the previously described functional and impairment categories. Team of Army College of Dental Sciences organized a clinical decision-making program on the 28th of January 2022. In order to become better equipped to identify the problem and implement it in a better possible way; 31 students participated. All the students were given a case. They were divided into groups and asked to prepare a treatment plan. There was active participation by everybody and an in depth understanding behind the various approaches that can be followed in order to provide the patient with a holistic treatment. 68.2% of the students were Post graduate students and remaining 27.3% were undergraduate students. Among the students participating 72.7% thought that the problem-based learning will prove to be extremely helpful in the course of study. The key-take away from the session was the multidisciplinary approach towards a case thereby providing a holistic and an evidence-based treatment plan. Feedback forms were distributed among the participating students few suggestions given by the students included that the presentation must incorporate more graphics and that such discussions must be done on a regular basis.

## Program Report – Clinical Decision Making

Clinical decision making is a problem-solving process of gathering and analyzing examination information from the previously described functional and impairment categories. Team of Army College of Dental Sciences organized a clinical decision-making program on the 31<sup>st</sup> of January 2022.

In order to become better equipped to perform outstanding clinical decision making and foster excellent physician- patient communication; 32 students participated. All the students were given a case of a 35-year-old man suffering from severe bruxism. They were divided into groups of four and asked to prepare a treatment plan. There was active participation by everybody and an in depth understanding behind the various approaches that can be followed in order to provide the patient with a holistic treatment.

81.8 % of the students were Post graduate students and remaining 18.2 % were undergraduate students.

Among the students participating 68.2 % thought that the clinical discussion will prove to be extremely helpful in the course of study.

The key take away from the session was the multidisciplinary approach towards a case thereby providing a holistic and an evidence based treatment plan.

Feedback forms were distributed among the participating students few suggestions given by the students included that the presentation must incorporate more graphics and that such discussions must be done on a regular basis.

Subject: Proposal Letter for Teacher Training Program on 7<sup>th</sup> Feb'2022 for Faculty of ACDS.

Respected Sir,

This is for your kind information that the Dental Education Unit would like to request your permission and support to conduct a Virtual Teacher Training Program for the Faculty of ACDS. The program will have lectures, interactive sessions and group discussions.

The focus will be to enable dental educators to effectively perform their multiple roles as a facilitator, information provider, role model, assessor, resource developer and curriculum planner.

The Guest Faculty are a team of 4 resource persons from Sri Ramchandra Institute of Higher Education and Research, Chennai.

The Program schedule, list of Guest Faculty and program details in SAF format are appended for your perusal and approval.

Thanking you,  
Warm Regards

  
Dr. V. Krishna Priya,  
Presiding Officer,

Army College of Dental Sciences

Feedback summary	Positive feedback was received from all the participants. The program was rated excellent by 62% of the participants and very good by 48%. Lectures were engaging with good examples. Interactions, quizzes, pre-test; post-test and questionnaires encouraged the participants to actively take part in the program.
Program summary, analysis & recommendation	A virtual Teacher's Training Program was conducted by the Dental Education Unit and the Scientific Academic Forum of Army College of Dental Sciences for the faculty of ACDS. The workshop was an ice-breaking session giving an insight on basics of teaching like goals, objectives, competencies, programs, courses, Units, Teaching and Learning methods, methods of training in clinical skills and assessment of knowledge and skills. The program began with the exchange of greetings between the Principal and Registrar of ACDS and the Dean of Sri Ramchandra Institute of Higher Education and Research, followed by a Prayer song. A pre-test was conducted following which the lecture began. The sessions were interactive encouraging active participation from the audience. A post-test was conducted at the end of the course. The participants recommended conducting an offline program on the same topic as well as other topics like OSCE, 3-D presentation in classroom, student-teacher relationship and hands-on with various teaching and assessment methods.

## Program Report

The lecture on Evidence Based Dentistry was conducted on 19<sup>th</sup> Feb 2022 at 2:00PM in lecture hall 4. The lecture was taken by Dr Subramanya Sharma, Principal ACDS. The lecture was attended by teaching staff and Postgraduates of all the departments. The lecture was attended by a total of 38 participants which included 20 staff members and 18 postgraduates.

The lecture provided more insight for students and staff alike on why research plays such an important role in our field. At the same time how even students can start a research, how to approach any research, resources and materials required for any research.

The feedback of the program was very positive and most of the participants were interested in further such sessions.

## Program Report

The Program was targeted at interns, postgraduates and teaching staff. The Program started at 11AM at Lecture hall 4. A total of 20 staff, 18 Postgraduates attended the program. The aim of the program was to explain two important aspects of dental surgery i.e Implant Dentistry and Orthognathic surgery. Dr M Veerababu explained about the basic principles of Orthognathic surgery and shared his experience in different scenarios of jaw correction showing his operated cases. He also took a lecture on various surgical approaches to facial skeleton which was very helpful specially for the Oral Surgery Postgraduates.

Second session was taken by Dr. D Arunachalam, who shared his knowledge on basics of Implantology and practical tips on treatment planning for Implants. Both the sessions were interactive and intriguing and was well received by the Postgraduates and Staff alike.

The Virtual Reality Of Digital Dentistry In Your Practice

**Program Summary and Report**

Date	6 <sup>th</sup> March 2022
Program Title	The Virtual Reality of Digital Dentistry in your Practice
SAF Program no	ACDS-19-22
Department/committee	Scientific Academic Forum
Program Type	Lecture and Live Demonstration
Venue	Sushrutha Auditorium, ACDS
Resource person & Topic	Dr Dhandapani Arunachalam, BDS, MDS (Periodontology) MBA, Fellow (ITI), (ICOI).
Co-ordinator name	Dr. Sukhvinder Bindra, Presiding Officer, SAF
Permission details	Principal Office, ACDS
No of Participants	31
Expenses	
Feedback summary	Overall positive feedback was received from the participants with a 65% rating as excellent, 30% as Good and 5% as fair. The key takeaways were to understand the role of CBCT in Dentistry and to be able to use the Intra-Oral Scanner and 3-D Printer and techniques of integrating the dental model scan with the CBCT Scan for further treatment planning. The Future recommendations were to conduct more elaborated workshops for basics in implants and 3-D printing with Hands-on sessions.

## Feed back Analysis

The scientific Academic Forum and Dental Education Unit of ACDS organized a program “The Virtual Reality of Digital Dentistry in your Practice” as an Academia-Industry collaboration with Blu Oceana Dental Pvt. Ltd., Chennai. This was the first trial CDE program for Postgraduate students and Faculty on 6<sup>th</sup> March 2022, from 10.00 hrs to 15.00 hrs at the Sushurtha Auditorium, Army College of Dental Sciences. The guest speaker for this program was Dr.Dhandapani Arunachalam, Periodontist and Adjunct Professor at Sri Ramchandra Institute for Higher Education.

A total 30 participants (14 Faculty and 16 Postgraduate students) have attended and benefited from the ice-breaking session.

### 1. Feedback for Digital Dental Flow(lecture 1)

We received 10 responses out of which 60% participants told that it was excellent programme and they appreciated the resource material discussed. Seven participants found it very useful in day-to-day clinical practice and 80% of participants desire to have further session on this subject.

Future corrective actions suggested:

- Implant planning on CBCT using laptops
- Interdisciplinary learning of Implant planning
- Discussion of completed cases with post treatment outcome

### 2. Feedback for guided Implant surgery (lecture 2)

21 responses were received for this and 71.4% participants found it to be excellent and they think that it will help in their course of study and career.

The program was found to be informative and participants were happy that they were allowed to discuss their inputs with the guest speaker.

Future corrective action suggested:

- Full mouth rehabilitation,
- Craniofacial anomalies,
- Zygomatic implants
- Pterygoid implants
- Software Analysis
- More hands-on sessions should be encouraged.

### 3. Types of surgical guides (lecture 3)

13 responses were recorded for the feedback of this session with maximum participation from Department of oral and maxillofacial surgery. 69% participants found it excellent and 76.9% of participants have given the consent for further sessions on this subject. The

  
(Dr. S Subramanya Sharma)  
Principal  
Army College of Dental Sciences

highlights of this session were reduction born Guide and students were able to learn the difference between partial and fully guided implant surgery.

Future corrective actions suggested:

- Maxillary sinus pathology should be discussed separately
- Virtual planning and pterygoid Implants along with software analysis should be included in the workshop.

4. Demonstration of Intra Oral Scanner and 3-D printer (lecture 4)

14 responses were received for this session and 71.4% of the participants found the content of program excellent They found the resource material discussed was current and relevant and it will help them in their future course of study and career. 78% of participants think that future sessions should be conducted on this subject

Future corrective actions suggested:

- Hands-on workshop for software analysis
- Zygomatic and Pterygoid implants
- Design of Crown Margins
